

The Capstone Project documentation submission dates are in the last week of the fourth and final block of the semester (8-12 June 2026). During the same period, you will also be required to defend your Capstone Project. To avoid unnecessary trouble, make sure you have finished documentation by 4th June 2026. This will allow you time to have plagiarism checked by your supervisors. Don't do the last-minute rush.

Capstone Project Write-Up Final Documentation

Title Page (Cover Page)

Contents:

- Project Title
- Student Name
- Registration Number
- Institution / Faculty/Department
- Supervisor(s)
- Date of submission

Abstract (Executive Summary) **This is written when all the project has been finished even though it appears first on project document.**

Key Points:

- Brief overview of the project (150–300 words)
- Problem being solved
- Methodology used
- Key results / outcomes

Acknowledgements

- Thank supervisors, institutions, sponsors, or contributors

Table of Contents

- List of chapters and subheadings with page numbers

List of Figures & Tables

- Helps readers locate diagrams, charts, and tables

List of Abbreviations (Keywords)

Example:

- AI – Artificial Intelligence
- NLP – Natural Language Processing
- ML – Machine Learning

Chapter 1: Introduction

Contents:

- Background of the study
- Problem statement
- Aim and objectives
- Research questions
- Significance of the study
- Scope and limitations

Example:

For AI cooking oil system:

- Problem: Inefficiencies in production and quality control

Chapter 2: Literature Review

Contents:

- Review of existing systems / research
- Theories and concepts (AI, ML, IoT, etc.)
- Gaps in existing solutions

Hint:

- Cite academic sources
- Compare different approaches

Chapter 3: Methodology / System Design

Contents:

- Research methodology (qualitative, quantitative, mixed)
- System architecture
- Data collection methods
- Tools and technologies used

Example Tools:

- Python, TensorFlow
- Databases (MySQL, MongoDB)

Chapter 4: System Implementation

Contents:

- System development process
- Algorithms used
- Screenshots / system interfaces

Example:

- AI model training process
- API integration

Chapter 5: Results & Discussion

Contents:

- System performance results
- Evaluation metrics (accuracy, precision, recall)
- Analysis and interpretation

Hint:

- Use graphs, tables, and charts

Chapter 6: Conclusion & Recommendations

Contents:

- Summary of findings
- Whether objectives were achieved
- Recommendations for future work

References

- List all sources cited
- Use a standard format (**Strictly Harvard and to be consistent**)

Appendices

Include:

- Code snippets
- Questionnaires
- Extra diagrams
- User manuals

SUMMARY

A capstone project typically follows:

1. Title Page
2. Abstract
3. Introduction
4. Literature Review
5. Methodology
6. Implementation
7. Results
8. Conclusion
9. References
10. Appendices
